## CVS Caremark Generic Preventive Drugs

Certain preventive generic drugs may be covered at 100% when purchased at CVS Pharmacy or through CVS Caremark® Mail Service Pharmacy. Preventive generics include certain medications for these conditions:

- Asthma
- High Blood Pressure
- High Cholesterol
- Diabetes
- Heart Disease and Stroke
- Osteoporosis related
- Prenatal vitamins

In addition, Health care reform under the Patient Protection and Affordable Care Act (PPACA) requires plans to cover certain preventive medications and products at 100%, or no cost-share (\$0) to you. The U.S. Preventive Services Task Force and the Institute of Medicine provides guidance on which drug classes should be covered.

For certain Diabetes drugs that do not meet the criteria of a generic preventive drug, the Honeywell medical plan provides coverage at 80% and the deductible does not apply when purchased via mail order.

Preventive Generic lists are updated regularly. Please visit your pharmacy benefits website or contact member services to confirm coverage of medications. You will be able to estimate how much your medication may cost and view lower-cost alternatives, if available.
